

Typographical error in the historical steel shapes file, “OldRolledShapes.brlx”

Applies to the following products:

- BrD, BrR and BrDR

Description

Some data fields for the historical steel shapes in the “old rolled shapes.xml” file or the ‘OldRolledShapes.brlx’ library file delivered with BrDR contain incorrect values. If you imported steel shapes from this xml file into your library, you should correct these values.

Resolution

Correct the following values for the following imported steel shapes in the BrDR Steel Shapes Library windows. Also correct these values in the Bridge Steel Shapes windows if these shapes have been copied to any of your bridges.

Applies To	Shape Name	Incorrect Data	Incorrect Value	Correct Value
Version 6.7.1 and previous releases	12WF(CB124),12X12x72	Area	12.16	21.16
Version 6.7.1 and previous releases	S15x45B	Ix	544.8	455.8
Version 7.6 and previous releases	33WF(CB331),33x11.5x130	Ix	669.0	6699.0

Status

The above resolution will correct the data in your database.
